

CUSP Data Report Card

MARCH 2023

Data Ingestion Report

This section shows the monthly number of records ingested into the CUSP source schema from all data sources. It is organized by data source and lists the full set of data tables received from each source and the count of records ingested from these tables into the CUSP in monthly data refreshes. Cells highlighted in **green** indicate that the record count for a particular source table remained consistent across data loads and the month-over-month deviations observed are within an acceptable or expected range. Cells highlighted in **red** indicate that the record count from a particular table in a given month deviated more than expected from prior months and should be investigated for potential source data system issues.

Data Source: Data Source 1

Source Table	04/2023	05/2023	06/2023	07/2023
1 Datasource1.children.enrolled	5,638	5,568	5,340	5,025
2 Datasource1.providers	1,616	1,696	1,764	1,854

Data Source: Data Source 2

Source Table	04/2023	05/2023	06/2023	07/2023
1 children_datasource2	750	750	750	200
2 providers_datasource2	95	95	95	95

Data Source: Data Source 3

Source Table	04/2023	05/2023	06/2023	07/2023
1 providers_datasource3	25	25	25	25

Data Source: Data Source 4

Source Table	04/2023	05/2023	06/2023	07/2023
1 providers_datasource4	260	260	260	260
2 Children_enrolled_datasource4	3,000	3,109	3,200	3,200

Data Source: Data Source 5

Source Table	04/2023	05/2023	06/2023	07/2023
1 providers_datasource5	175	175	175	90
2 children_datasource5	458	458	458	200
